(c) Actual export growth during 1992-93 was lower than the target. Among the reasons for slow growth in exports in 1992-93 mention may be made of rapid fall in trade with CIS and East European countries recession in industrially advanced countries and sluggish growth in World trade. However, exports performance in the current year is satisfactory. The export growth provisionally estimated at 20.19 per cent during April-October, 1993 compared to April-October, 1992 latest period for which trade data are available, is about same as the target set for the year.

(d) In order to increase exports in the Eighth Plan period the Government have taken major steps for liberalisation of trade which include provision of export linked imports, reduction of import licensing, strengthening export incentives and removal of procedural irritants through simplification of Policy and procedures. In 1993-94 Budget, the system of market determined unified excahnge rate has been introduced and customs and excise duty on imports mary raw materials and capital goods have been reduced. An export culture is sought to be built up in the country incorporating of Government agencies and trade and industry. Emphasis is being placed on improving quality to increase competitiveness and production specifically for export.
